MONTANA WATER COURT, YELLOWSTONE DIVISION
YELLOWSTONE RIVER ABOVE AND INCLUDING BRIDGER CREEK BASIN
BASIN 43B
PRELIMINARY DECREE

CLAIMANTS: Lu A. Peterson; Robert D. Peterson

CASE 43B-0879-R-2022
43B 149263-00

NOTICE OF FILING OF MASTER'S REPORT

This Master's Report was filed with the Montana Water Court on the above stamped date. Please review this report carefully.

You may file a written objection to this Master's Report within **10 days** of the stamped date if you disagree or find errors with the Master's finding of fact, conclusion of law, or recommendations. Rule 23, W.R.Adj.R. If the Master's Report was mailed to you, the Montana Rules of Civil Procedure allow an additional 3 days to be added to the 10-day objection period. Rule 6(d), M.R.Civ.P. If you file an objection, you must mail a copy of the objection to all parties on the service list found at the end of the Master's Report. The original objection and a certificate of mailing to all parties on the service list must be filed with the Water Court.

If you do not file a timely objection, the Water Court will conclude that you agree with the content of this Master's Report.

MASTER'S REPORT

Claim 43B 149263-00 appeared in the Preliminary Decree with the following issue remark:

THE FLOW RATE IS MISSING.

The issue remark was not addressed and resolved during the objection process. The Legislature has directed the Water Court to resolve the issue remarks using the procedures set forth in section 85-2-248, MCA.

Under Section 85-2-248(3), MCA, information in the claim file or other information obtained by the Court can be reviewed to determine if it provides a sufficient basis to resolve the issue raised by a remark. In this instance, the information in the claim file is sufficient to address and resolve the issue remark. In order to give the claimants an opportunity to file additional evidence if they so chose, an Order Consolidating Case and Setting Filing Deadline was issued on December 2, 2022 setting a February 2, 2023 filing deadline. Nothing was filed. The February 7, 2023 Order Entering Defaults and Order Setting Deadline Pursuant To Section 85-2-248(9)(a), MCA states:

Under Section 85-2-248(3), MCA, information in the claim file or other information obtained by the Court can be reviewed to determine if it provides a sufficient basis to resolve the issue raised by a remark and the Court can provide the claimants an opportunity to file additional information or evidence. The Statement of Claim states that the flow rate is 20.00 miner's inches (equal to 224.40 GPM). The Preliminary Decree states the means of diversion is PIPELINE. Therefore, it appears 224.40 GPM should be added as the flow rate. Pursuant to 85-2-248(9)(a), MCA, it is

ORDERED that the deadline for the claimants to show cause in writing why the Court should not proceed with amending claim 43B 149263-00 as described above pursuant to section 85-2-248(9)(a), MCA, is **March 10, 2023**. If no additional information is filed by this deadline, the Court will proceed with amending the claim as detailed above.

Nothing was filed. The Orders are viewable in the Court's FullCourt Enterprise case management system.

APPLICABLE LAW

"All issue remarks to claims that are not resolved through the filing of an objection as provided in 85-2-233 must be resolved as provided in this section." Section 85-2-248(2), MCA.

A properly filed Statement of Claim for Existing Water Right is prima facie proof of its content pursuant to section 85-2-227, MCA. This prima facie proof may be contradicted and overcome by other evidence that proves, by a preponderance of the evidence, that the elements of the claim do not accurately reflect the beneficial use of the water right as it existed prior to July 1, 1973. This is the burden of proof for every assertion that a claim is incorrect including for claimants objecting to their own claims. Rule 19, W.R.Adj.R.

FINDING OF FACT

The Preliminary Decree does not include a flow rate. The flow rate should be 224.40 GPM. The issue remark should be removed as addressed and resolved.

CONCLUSION OF LAW

The information in the claim file is sufficient to resolve the flow rate issue remark without evidentiary hearing. Sections 85-2-248(3) and (9), MCA.

RECOMMENDATIONS

Based upon the above Finding of Fact and Conclusion of Law, this Master recommends that the Court make the changes specified in the Finding of Fact to correct the Preliminary Decree for this Basin. A Post Decree Abstract of Water Right Claim is served with this Report to confirm the recommended changes have been made in the state's centralized record system.
